

HIGH PURITY BIOSTIMULANT AND MICRONUTRIENT FERTILIZER PRODUCTS

IGROW M5 - EC FERTILIZER

Dry 100% water-soluble organic mineral micronutrient fertilizer for foliar feeding and drip irrigation.

- Total micronutrients 5,04%
- Organic matter 40%
- Potassium (K2O) 11%
- Sulfur 4%
- Moisture 15%
- 1 kg and 0,5 kg packs

FEATURES

Organic matter is of plant derived fulvic acids and humic substances, and features components with an effect of auxin and gibberellin activity.

iGrow M5:

- Enhances the transportation of nutrients to plant cells
- Boosts chlorophyll levels
- Stimulates leaf surface growth
- Increases the intensity and duration of flowering
- Relieves chemical stress after pesticide treatment

BENEFITS

The iGrow M5 micronutrient fertiliser is a soluble powder-based solution, which does not contain abrasive particles. You can use it in various applications, including low-volume spraying, drip irrigation, foggy formers, foliar feeding, seed dressing, and fertigation.

1 kilogram of iGrow M5 makes up to 2000 litres of working solution for foliar application.
